David,

FYI please see below. This makes me wonder if the SOAH record is going to contain the data we need. At the least, it should contain the chart Dave references below. Are you still proceeding to ask for that data?

Ray Leissner, Env. Eng. Ground Water / UIC Section (6WQ-SG) (214) 665 - 7183 USEPA, Region 6

The FIRST STEP in protecting your ground water is to have your well tested.

Jose Torres Hello Phil, Ray: I just had a brief visit with David... 10/05/2012 10:35:43 AM

Subject: The Goliad Project Long Pumping Test Report

Hello Phil, Ray:

I just had a brief visit with David Murry of TCEQ. I asked him if he could provide us a copy of the report for the longer pumping test performed near the NW Fault at the Goliad Project.

David said that he has not seen that report, that it was not part of UEC's application package. He clarified that, at the hearing, he only responded questions about a graph that was presented to him, that he did not conduct an analysis of the test. He went further to say that he had already provided the above information to Bill Honker during a call yesterday at 4:00 pm.

I must add that Dave seemed uneasy about my having asked the question, and could hardly conceal his "euphoria" over having been approached on this subject. So, gentlemen, please beware.

Call me if you have questions.
